BioOne (www.bioone.org) is a nonprofit, online aggregation of core research in the biological, ecological, and environmental sciences. BioOne provides a sustainable online platform for over 170 journals and books published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Web site, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/page/terms_of_use.

Usage of BioOne content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

**In Memoriam
Richard L. Penrose
(1943–2011)**

This issue of *The Pan-Pacific Entomologist* is published in memory of Richard L. Penrose (11 January 1943–17 March 2011), long-time member of the Pacific Coast Entomological Society and an active participant in the guild of California-based cerambycid workers. Included in the issue are a brief biographical sketch, personal remembrances, and summary of his entomological contributions (i.e., lists of entomological publications and taxa described by him and in his honor), followed by submitted papers from some of his friends and colleagues.

I would like to express my deep appreciation to the Executive Council of the Pacific Coast Entomological Society (Rolf L. Aalbu, President; Vince Lee, Managing Secretary; and Bob Zuparko, Treasurer) for their agreement and support to publish this special issue. I also acknowledge Rick Westcott, Oregon Department of Agriculture, Salem, and Chuck Bellamy, California Department of Food and Agriculture, Sacramento, for their enthusiasm and persistence in helping to bring this memorial issue to fruition. Very special thanks to Floyd Shockley, Smithsonian Institution, Washington, D.C., who as PPE Coleoptera Subject Editor oversaw reviews for the majority of the papers published in this issue.

Ted C. MacRae,
Managing Editor, *The Pan-Pacific Entomologist*
